## Webinars

[Developing Mission and Safety-Critical Applications Under DO-178B with Esterel SCADE Suite - An Introduction](#)

Date: June 4

Time: 10:00 a.m. and 2.00 p.m. EST

Join us for an introduction to developing Mission and Safety-critical Applications under DO-178B with SCADE Suite. We will introduce the value of the formal design, verification, and implementation technologies offered by SCADE Suite to develop critical embedded control applications. In essence, we will look at the problems developers face when confronted with DO-178B level A compliance and how the SCADE Suite technology helps them increase their productivity while maintaining the highest level of safety and reliability in their applications.

Space is limited, [Register Now!](#)

## Trade Shows & Regional Events

[MNTK-2008: 6th International Scientific and Technical Conference "Safety, Efficiency and Economics of Nuclear Power Industry"](#)

*May 21-23 Moscow, Russia*

[Metro China 2008](#)

*June 3-5 - Guangzhou, China*

[User Experience of Tools for Safety-Critical Systems seminar](#)

*June 5 - London, United Kingdom*
