Product News - Esterel SCADE Suite® & Esterel SCADE Display™

Esterel SCADE Suite® includes several features to safely manage multi-users projects. Among them, the **Model Diff** function of the SCADE Suite Editor allows project teams to **pinpoint semantic differences** between two versions of a model, and then to locate precisely the differences including in the graphics. [Read more...](#)

Esterel SCADE Display™ enables rapid simulation of the specification through a simple and intuitive GUI, without the need to write complex scenarios. The SCADE Display **Ergonomics Checker** enables users to optimize their graphical specifications as early as the design phase and to maximize the generated code performance. [Read more...](#)

Esterel SCADE Industrial Applications

SAGEM minimizes the Time & Cost to develop navigation functions with Esterel Technologies' SCADE Suite: SAGEM has been using SCADE Suite since 1994 to develop helicopter autopilots, an inertial platform and an air data function. They are now deploying this new method for the development of critical software for navigation systems. [Read more...](#)
