Free Webinar Series: Critical Embedded Software Solutions

Developing Mission and Safety-Critical Applications Under DO-178B with Esterel SCADA Suite - An Introduction

September 16, 2008 at 10:00 a.m. and 2.00 p.m. EDT

November 25, 2008 at 5:00 a.m. and 2.00 p.m. EDT

Join us for an introduction to developing Mission and Safety-Critical Applications under DO-178B with SCADA Suite. We will introduce the value of the formal design, verification, and implementation technologies offered by SCADA Suite to develop critical embedded control applications. In essence, we will look at the problems developers face when confronted with DO-178B level A compliance and how the SCADA Suite technology helps them increase their productivity while maintaining the highest level of safety and reliability in their applications.

Develop Certifiable Safety-Critical Embedded Graphics Display Applications Faster with Esterel SCADA Display™ - An Introduction

September 18, 2008 at 10:00 a.m. and 2.00 p.m. EDT

November 20, 2008 at 10:00 a.m. and 2.00 p.m. EDT

Join us for an introduction to expediting the development of Safety-Critical Embedded Graphics Display Applications, using SCADA Display. Developed in conjunction with airframe and cockpit display manufacturers and with inherent support of OpenGL (SC), the safety-critical variant of OpenGL, SCADA Display enables high-quality applications with optimal developer efficiency.

Buckle Up For Safety: Developing Software for Mission and Safety-Critical Systems

October 23, 2008 at 2.00 p.m. EDT

This E-cast will provide crucial insights on how to choose the software, operating system, modeling tools and the methodology to expedite development of systems that meet the highest levels of quality and safety. Of note, we'll cover RTOS, UML/SysML, DO-178B, IEC 61508 and more... be sure to strap in.

Developing Safety-related Railway Applications under EN 50128 with Esterel SCADE Suite - An Introduction

October 29, 2008 at 10:00 a.m. and 2.00 p.m. EDT
December 3, 2008 at 10:00 a.m. and 2.00 p.m. EDT

Join us for an introduction to developing Safety-related Applications under EN 50128 with SCADE Suite. In this webinar, we will introduce the value of the formal design, verification, and implementation technologies offered by SCADE Suite to develop critical applications under EN 50128. In essence, we will look at the problems developers face when confronted with EN 50128 up to SIL 4 compliance and how SCADE Suite technology helps them increase their productivity while maintaining the highest level of safety and reliability in their applications.
