

## Facing The New Challenges Of Your Embedded Architecture

**Register Now** »

Wind River and Embedded Technologies are pleased to invite you to attend a full day event that will help you face the many challenges encountered when developing the future generation of your embedded designs. If hardware consolidation, time-to-market acceleration, off-the-shelf software solution adoption, security and certification changes in your industry are at the heart of your concerns, then this is THE seminar you should attend.

### When & Where

**March 17, 2009**  
 NOVOTEL - Puente de la Paz  
 C/ Albacete 1  
 Esquina avenida de badajoz  
 28027 MADRID
